ASR Call Out Procedure

Revision date: 10 September 2004

1. Description

The call out procedure is possibly the most important SOP that needs to be clearly understood. This SOP describes the procedure for contacting and activating the ASR Unit. This SOP also lists the names and contact details of the ASR Unit team leaders who are responsible for coordinating a call out.

Team Leaders are responsible to coordinate and ensure that the appropriate ASR crew and equipment required for a mission are ready to depart within the required time.

2. Procedure

Located at 22 Sqn is a 4/Warn paging system. This device is located in the Ops Room and consists of 5 buttons. Operators are to call all the Team Leader as listed in the table below, advising them of the call and the requirements.

Team Leaders will then activate the appropriate team to respond and feedback information to base ops as required.
